

Shoveling small batches is a waste of time and money. **VIBCO will pump up your production.**

We're the Vibrator Guys.™

Product Application Bulletin #457 Model DC-500 12-Volt Vibrator

VIBCO'S SOLUTION

VIBCO's Model DC-500 12 Volt Battery Operated Vibrator was mounted onto the hopper grill. It immediately accelerated the rate at which the low slump concrete moved through the grill into the hopper. The vibration was effective enough to allow loading directly from the mixing truck - keeping a constant flow of concrete through the hopper grill.

VIBCO'S BENEFITS

After installing the VIBCO DC-500 12 Volt Battery Operated Vibrator the customer received the following benefits:

- Increased production
- No more man hours and time lost to shovelling the concrete in small loads
- Decreased material loss from the direct truck to grill loading

DC-500

GRATE VIBRATOR

“We were losing production time and materials...”

We were using a pump to move concrete, but at slumps less than three inches - we really needed a vibrator. Without one, we were losing production time and materials - not to mention the man hours we consumed shoveling concrete onto the hopper grill in small loads! We needed to be able to load directly from the mixing truck onto the grill and have things move through efficiently. We were so happy with the VIBCO DC-500's performance on the low slump pours, we now use it on standard pours, too!”

Plant Manager,
Steven B., Georgia

Model DC-500 12V Battery Operated Vibrator

- 4000 VPM Max Single Phase
- 450 lbs of force
- 12 or 24 Volt Power Available
- 73 dB on A-Scale at 1 meter
- Continuous Cycle
